UNITED STATES DEPARTMENT OF AGRICULTURE  
FARM SECURITY ADMINISTRATION  
HEALTH SERVICES PROGRAM

Activities of County, District and State Units, January - March, 1944

Resume of Membership Totals as of March 31, 1944

	<u>Units</u>	<u>Counties</u>	<u>Families</u>	<u>Persons</u>
Physicians' and surgeons' service only or in connection with other types of service	681	893	70,675	363,762
Hospital service offered separately	59	237	17,811	96,935
Physicians' and hospital service	740	1130	88,486	460,697
Less physicians' and hospital duplications*	(76)	88	7,366	36,125
Total physicians' and hospital service	740	1042	81,120	424,572
Dental service offered separately	209	233	23,817	123,120
Physicians', hospital and dental service	949	1275	104,937	547,692
Less dental duplications*	(177)	209	18,400	95,992
U. S. Total - (excluding duplications*) representing 41 states and Puerto Rico	949	1066	86,537	451,700

\*In counties having two or more separate units offering different types of service, the membership of the smaller unit or units has been deducted on the assumption that these families also held membership in the larger or largest unit.

Extent of Program

At the end of March, 1944, the FSA health services program had a total of:-

949 units in  
1,066 counties in  
41 states and Puerto Rico with  
86,537 families and  
451,700 persons holding membership.

Of these 949 units, the number offering each of the different types of service with the number of counties involved, the number of families and persons to whom each type of service is available, and the percentage these families represent of the total membership is shown below.

<u>Service</u>	<u>Units</u>	<u>Counties</u>	<u>Families</u>	<u>Persons</u>	<u>Per cent of Total Families</u>
Physicians'	681	893	70,675	363,762	81.7
Surgeons':					
Separate or with hospital	40	109	9,538	50,853	11.0
With physicians'	405	550	44,688	237,883	51.6
	445	659	54,226	288,736	62.6

<u>Service</u>	<u>Units</u>	<u>Counties</u>	<u>Families</u>	<u>Persons</u>	<u>Per cent of Total Families</u>
Hospital: Separate	59	237	17,811	96,935	20.6
With physicians'	359	505	40,361	195,705	46.6
	<u>418</u>	<u>742</u>	<u>58,172</u>	<u>292,640</u>	<u>67.2</u>
Drug: With physicians'	187	236	22,381	113,895	25.9
Dental: Separate	209	233	23,817	123,120	27.5
With physicians'	89	123	9,351	47,485	10.8
	<u>298</u>	<u>356</u>	<u>33,168</u>	<u>170,605</u>	<u>38.3</u>

The distribution by states of the units offering hospital, dental, or drug service separately or combined with physicians' service, as well as the number of counties involved and membership totals as of March 31, 1944, is shown in Table 2.

Changes in membership totals during January, February and March 1944

Comparison of totals of units, counties, families, and persons at the end of December 1943 and at the end of March 1944, for units offering physicians', hospital and dental service respectively and for all units taken together, is shown below:

<u>Physicians' Service</u>				<u>Hospital Service</u>

Per cent change in membership	-15.2			-7.1		

Losses are shown in the number of units in operation, the number of counties represented and the number of families holding membership for units offering physicians' and dental service. The loss in member families was out of proportion to the loss in units and counties, indicating that it was accounted for in part by loss in membership of units continuing in operation. Units offering hospital service, however, continued to show gains. A 28 per cent gain in membership was shown for the quarter with 88 new counties and 11 new units. This was also the only type of service for which a gain in membership was shown during October, November and December 1943, the gain for that quarter being 6.4 per cent. These gains during January, February and March were chiefly in Regions VIII and IV. In Region VIII, a 31-county unit in the extreme southern part of Texas and a number of new units in Oklahoma were the major factors in producing a membership increase of 1,995 families, which left the region at the end of the quarter with four times as

Table 1. Change in the total number of health service units, number of counties represented and totals of families holding membership during the quarterly period January - March, 1944 for the entire United States and for each FSA region and percentage reduction in the totals of FSA active standard borrowers during the same period.

a/ Percentages represent one-half of the gain or loss shown by figures for December 31, 1943 and June 30, 1944, compiled from monthly reports of FSA activities by Statistical Unit, Program and Reports Division, Tables 2-A.

many members in these hospital service groups as it had at the beginning of the quarter. In Region IV the hospital care program in North Carolina was extended to 26 new counties with an increase in membership of 975 families and in this same region a new 16 county unit also began operation in Western Tennessee with a membership of 777 families at the end of the quarter. This made a total increase in membership of hospital service groups in this region during the quarter of 1,752 families or 40 per cent of their membership at the end of December.

The extension of this hospital service program into 88 new counties balanced the loss of 40 counties by the physicians' and dental service groups and left the program with a net gain at the end of the quarter of five new counties after those of the 88 counties, which already had physicians' or dental service groups, had been deducted. The gain in members, however, was not able to counter-balance the corresponding losses of the physicians' and dental service groups with the result that a net loss of 6,640 families or 7.1 per cent of the membership at the end of December is shown.

The distribution of this loss among the different regions is shown in Table 1. All regions except Regions IV, VIII, X and XIII show loss in families. Regions X and XIII did not report any changes in membership during the quarter and the gains in Regions IV and VIII are accounted for entirely by their expansion in hospital services already mentioned. The largest proportionate loss in member families is shown for Region III which sustained a loss of 40.5 per cent of its membership during the quarter. This involved the discontinuance of 14 units in 15 counties chiefly in Missouri and Ohio. The names of the counties are listed at the end of Table 2. Information on the percentage reduction in the number of FSA active standard borrowers during the quarter, shown in Table 1, indicates that this continued to be a major factor in accounting for the reduction in membership of health service groups.

### Services reported

Approved charges for service and volume of service received during January, February and March 1944, for units operating on the fee-for-service basis and reporting for these months are shown in Table 2. The membership of these reporting units and the percentage it represents of the total membership in each of the various groups is as follows:

	<u>January</u>		<u>February</u>		<u>March</u>		<u>Average</u>
	<u>Member</u> <u>families</u>	<u>Per</u> <u>cent</u>	<u>Member</u> <u>families</u>	<u>Per</u> <u>cent</u>	<u>Member</u> <u>families</u>	<u>Per</u> <u>cent</u>	<u>Per</u> <u>cent</u>
Physicians' service alone or with other services	42,903	70.6	41,407	68.6	36,120	60.7	66.6
Hospital service							
separate	14,467	87.0	15,259	87.6	15,973	89.7	88.4
combined	20,218	59.7	19,072	57.1	15,357	47.3	54.8
Dental service							
separate	13,587	62.2	12,713	59.4	11,228	54.3	58.7
combined	5,416	62.7	5,023	59.5	3,837	43.4	55.1
Drug service	13,373	67.8	12,926	65.6	10,037	54.6	62.9

Part 1 of Table 2 also shows a record of payments **for** service reported by units operating on the capitation basis. Among the units for which membership but no record of activities is reported in Table 2, are the Southeast Missouri Health Service, Inc., and the Taos County Cooperative Health Association of New Mexico. Reports for January, February and March have been received from these associations, but due to the fact that they are special programs, operating on plans which differ considerably from those in general use, the totals on charges and payments for service and rates on volume of service have not been included in Table 2. Brief statements on these two programs are shown below.

The Southeast Missouri Health Service began the quarter with a membership of 1,649 families consisting of 8,820 persons and ended it with a membership of 866 families consisting of 4,741 persons. This 47 per cent reduction in membership is attributed in part to the fact that the association was beginning a new fiscal year and the families whose membership expired during the quarter were failing to apply for renewal. A total of 1,012 expirations were reported for the quarter with only 185 of them applying for renewal. Some significant totals and rates covering services rendered are as follows:

<u>Service</u>	<u>Charges (or costs)</u>	<u>Per cent payment possible</u>	<u>Charges per mo. per member (person)</u>	<u>Rate per 1000 persons per month</u>
Physicians	\$ 5,709.00	96.9	.26	86 calls
Surgeons	3,576.50	77.0	.16	3 cases
Hospital	2,034.00	100.0	.09	23 days
Dental	950.76			
Nursing	2,562.42			
Chronic conditions	168.00			
X-ray and Diagnostic	47.00			
Administration	2,526.50			
Total	17,574.18			

The per cent payment possible shown above for physicians' and surgeons' services was not the percentage paid. For these two types of service an arbitrary fifty per cent payment on charges was made at the end of the quarter and balances were carried to the end of the year for proportionate payment from balances remaining at that time. Hospital bills were paid in full as indicated.

For the Taos County Cooperative Health Association the membership at the beginning of the quarter was 945 families consisting of 4,976 persons and at the end of the quarter, 1,100 families consisting of 5,805 persons. Significant rates on the services received by members of this association are as follows:

	<u>Rates per 1,000 persons per month</u>
Physicians' clinic visits	150
Clinic visits to nurse only	14
Nurses' home visits	28
Hospital admissions	11
Days of hospitalization	57

### Physicians' and Surgeons' Service

Office, home and hospital calls by physicians and surgeons reported for January, February and March 1944 averaged 111 per thousand persons per month for all associations. This is slightly higher than the rate of 104 calls for the previous quarter, October - December 1943, and almost identical with the rate of 110 calls for January - March 1943. The rates for the different regions (Table 2, Part 1) ranged from 177 for Region XI to 60 for Region IX, the rate for Region IX being based on the report of two small groups in Arizona, since no reports had been received from either California or Utah groups.

Corresponding with the rise in the volume of service as compared with the previous quarter was a slight rise in the average charge per person eligible for service from 30 cents per month for October - December 1943 to 32 cents for January - March 1944. This in turn reduced the percentage payment on physicians' and surgeons' bills from 79.9 per cent during October - December 1943 to 77.7 per cent during January - March 1944. Percentages paid in the different regions ranged from 56 per cent for Region III to 100 per cent for Regions II and IX. In Region III a number of the groups paid an arbitrary fifty per cent on charges regardless of the funds available, carrying the balances forward for final payment at the end of the year. The 56 per cent shown for this region is based, therefore, not on the payments actually made but on the payments which would have been made had all groups paid as much as their available funds permitted.

### Hospital Services

Hospital services are reported in Parts 2 and 3 of Table 2, Part 2 covering services offered in combination with physicians' services and Part 3 covering services offered by groups providing hospital service alone or in combination with surgery. Service offered in combination with physicians' service averaged 13 days per thousand persons per month at an average charge of nine cents per month per person eligible for service and payments on charges averaged 71 per cent. The charges constituted 20.9 per cent of the total physicians', surgeons' and hospital charges. Corresponding rates for the previous quarter were 11 days per thousand persons per month, an average charge per person eligible for service of seven cents per month, 80 per cent payment on charges and the charges constituted 23.6 per cent of the total physicians', surgeons' and hospital charges. In all points the rates for the two periods correspond very closely. When the rates for the various regions and states during the January - March period are examined, the rates for Region I are found to be extremely high. This is due to the services reported by one association in Western New York. It reported an excessively large amount of service rendered during all three months reaching a peak in February with a rate of 287 days per 1,000 persons per month. The rates for the other regions ranged from three to 34 days per thousand persons per month and the charges per person eligible for service ranged from three to 19 cents per person.

For groups offering hospital service only or in combination with surgical service (Table 2, Part 3), a rate of 17 days per thousand persons per month is shown with a charge averaging seven cents per month per person eligible for service and 93.1 per cent payment on charges. The corresponding rates for the previous quarter were 19 days per thousand persons per month, eight cents per month per person eligible for service and 91.6 per cent payment on charges.

Charges for surgical services offered in combination with hospital service averaged seven cents per month per person eligible for such service and the percentage paid on charges averaged 65.9 per cent.

#### Drug Service

The record of drug service (Table 2, Part 4) covers charges for drugs dispensed by physicians or by druggists and paid for out of separate funds designated for this purpose. For associations operating on this basis the charges for drugs constituted 14.9 per cent of the total charges for physicians' and drug services as compared with 12.3 per cent for the previous quarter; the charge per person eligible for this service averaged five cents per month as compared with four cents for the previous quarter; and the percentage paid on charges was 84.7 per cent as compared with 91.4 per cent for the previous quarter.

#### Dental Service

During the months, January, February and March 1944, dental service, offered in combination with physicians' service (Table 2, Part 5), was rendered to nine persons per month per thousand persons holding membership in these groups. The charge averaged three cents per person per month when distributed over the entire membership, and payment on charges averaged 90.7 per cent. The corresponding rates for groups offering dental service only (Table 2, Part 6) were 17 persons per thousand per month receiving service at a cost of six cents per month per person eligible for the service and payment on charges averaged 95.6 per cent. It is characteristic of these two plans for providing dental service that the groups formed to secure dental services only, generally make more adequate financial provision for this service and as a result secure a larger amount of dental care. It will be noted that while the units offering only dental service served twice as many of their members as the units offering this service together with physicians' service and their average charge per member eligible for service was consequently twice as high, they paid 95.6 per cent on these comparatively high charges as compared with 90.7 per cent paid on their lower charges by the groups which offered dental service with physicians' service. These latter units did not, however, consistently maintain these low rates in all regions. Rates, comparable with those of the separate dental groups, are shown for Region IV and Region VI in Table 2, Part 5 and the rates for the other regions show considerable variation as compared with the rates of the separate dental groups.

The main variations from the average charge per person eligible for service shown for the separate dental programs in Table 2, Part 6 are those for Michigan in Region II and Oregon and Idaho in Region XI. The group in Michigan covered by this report was operating on the individual plan. According to this plan the families securing the service pay the dentist a charge agreed upon in advance to cover the cost of that service. These groups do not, therefore, have a definite allotment of funds for each month and rates do not have the same significance as they do for plans operating on the fee-for-service plan. In Oregon and Idaho higher membership fees are charged and the dentists are paid on a per hour rather than a per service basis. Facilities of the Agricultural Workers Health Association, used in serving farm workers during the crop season, were also made available to local groups during these winter months and the charges shown cover programs of intensive service during the period they were available.

Table 2. FSA Health Services Program, January - March, 1944

Footnotes

- a/ Payments rather than charges for units operating on a Capitation basis.
- b/ Membership totals for these units have been taken from reports for months other than March.
- c/ These units pay no more than fifty per cent on charges at the end of each month or quarter, delaying further payment until the end of the year. The entry under Per cent paid for these units is the estimated percentage which could be paid if all funds available for payment of bills this month were distributed.
- d/ Information incomplete.

Medical Units

January - March, 1944

Newly Reported

Region IV

Tennessee: Haywood County  
Hickman County added to Dickson -  
Hickman unit

Region V

Georgia: Early County

Discontinued

Region III

Illinois Gallatin County  
Saline County

Indiana: Wells County

Missouri: Barton County  
Gasconade County  
Holt County  
St. Charles County

Ohio: Crawford County  
Geauga - Lake (a two-county unit)  
Henry County  
Medina County  
Sandusky - Ottawa (a two-county unit)  
Wayne County

Region IV

Kentucky: Whitley County

North Carolina: Cumberland County  
Union County

Region VIII

Oklahoma: Payne County added to  
Medical plans formerly  
listed as Hospital only

Texas: Lavaca County  
Wilson County

Region VI

Mississippi: Chickasaw County  
Carroll County (duplicate  
listing)

Arkansas: Crittenden County unit  
now carried with Townes  
Farm Project

Region VII

Kansas: Mitchell - Lincoln (a two-  
county unit)  
Phillips County  
Republic County

South Dakota: South Central South Dakota  
(a 13-county unit)

Region XII

Texas: King County dropped from  
Dickens-Kent unit

Hospital Units

January - March, 1944

Newly Reported

Region IV

North Carolina: Bertie, Brunswick, Carteret,  
Jackson, Martin, Onslow, Pamlico,  
Watauga, Wilkes and Yancey Counties  
added to Hospital Care Association  
plan.

Alamance, Alexander, Allegheny, Buncombe,  
Burke, Caldwell, Currituck, Edgecomb,  
Forsyth, Hyde, Johnston, Jones, Montgomery  
and Rockingham added to Hospital Saving  
Association plan

Tennessee: Carroll County  
Crockett County  
Decatur County  
Dyer County  
Fayette County  
Gibson County  
Hardeman County

Tennessee: (continued)  
Haywood County  
Henderson County  
Henry County  
Hickman County  
McNairy County  
Madison County  
Obion County  
Perry County  
Tipton County

Region VIII

Oklahoma: Canadian County  
Garfield County  
Grant County  
Noble County  
Pontotoc County  
Okfuskee County  
Okmulgee County  
Osage County

Hospital Units

Discontinued

Region VIII

Oklahoma: Rogers County  
Payne County listed with  
Medical plans

Dental Units

January - March, 1944

Discontinued

Region I

Maine: Aroostook County

Region II

Michigan: Charlevoix County

Region III

Ohio: Logan County Dental plan  
listed with Medical plans

Region IV

North Carolina: Macon County

Region V

Georgia: Appling and Wayne Counties  
became a 2-county unit

Region VIII

Texas: Bell County
